Skylit Pyrotechnics Price Guide

Firework displays can vary greatly both in content and duration. Skylit Pyrotechnics can cater for a wide range of budgets and are keen to include any themes or content to make your firework display special. Below is a guide to costs, we provide a simulation for all our displays to give an idea of content and duration.

Whilst we are pleased to cater for any specific budgets or content our displays tend to focus on impact and content rather than duration.

Starter Display £750

Either make a shorter high impact display or a more graceful show of up to 4 minutes.

Recommended entry level £1200

A good solid core to the display including a varied range of products including a finale, still using larger aerial shells where safety limits allow.

Typical duration 5 to 6 minutes.

Mid-Range display £1200 - £3000

Building on the above with greater density of aerial shells and paired ground effects the intensity and duration of the display is uplifted. Using a wide range of products including premium shells we use our state of the art firing system to enhance the effects as the display builds its tempo to the finale.

Typical duration 6 – 10 minutes.

Upper Range display £3000 +

Adding to the mid-range content we build into the display colour layers and prolonged segmented themes to extenuate effects. Pyro-Musical can be included in this category. Typical duration 10 – 15 minutes (non-musical).
